To make them understand the contributions of Indian political thinkers, scientist, and philosopher in the formation of nation building and getting freedom from Britishers Imperialism.

COURSE OBJECTIVES:

The objective of the course is to enable the students to:

The course on Indian Political Thinkers is important for many critical reasons. India is considered to have contributed immensely to the field of philosophy. Ancient religious texts from diverse faiths such as Hinduism, Islam and Buddhism have had profound impact on the thought process of the thinkers. This is one fascinating fact about Indian Political Thinkers-ability of the thinkers to challenge colonial modernity with indigenous ideas. Language and metaphors used by the thinkers were able to awaken Indians from colonial yoke as well as from the evils of orthodoxy and social practices. Nevertheless, the thinkers were also informed by

Report on Value Added Course – Business Data Modeling

Business Data Modeling is one of the value -added courses given to I semester students of the batch 2021-23. The course was given to students to enable them to decide on how to collect and analyse the data for business decision making. The contents of the course was designed in such a way that students will get to know the importance of statistics in business decision making. The value-added course had five modules as Data analysis, Decision making, Statistical analysis, Charts & graphs, differentiation, and game theory. The basic objective of the course was to enable students to apply the use of statistics in real life business situations.

Business Data Modeling was considered as audit course. The entire course was taught for 30 hours which also included a practical component where students were assigned different sectors for making the presentation. Around twelve teams were formed, and they were asked to collect the data, analyse the data using different statistical tools and prepare a report on the same and submit. Around eighty students of the I semester MBA attended the course, and they found the course to be useful. The feedback was collected from the students at the end of the course.

Name of the Faculty offering the course: Dr Archana Bhat and Mr Ravi K Agrahara, Assistant Professor, PG Department of Psychology

No of hours : 30 Hours

Date of commencement of Course : 18th June 2021

Intended Audience: PG Psychology Students

Course Outline:

Psychotherapy is not something that is set in stone. Like any field of thought or science, psychotherapy is constantly changing and being added to. What is third wave therapy? It is the next popular movement in Western psychotherapeutic thought. To date, there have been three main approaches that have emerged since Freud and his ideas of psychoanalysis. These are psychodynamic, humanistic, and cognitive. The third wave we are now seeing is in response to cognitive therapy, and it has been in progress for over a decade. So it is often called 'third wave CBT therapy', as it is an attempt to troubleshoot and progress the tools of cognitive therapy. –
