

Surana College

AUTONOMOUS

16, South End Road | Bengaluru-04
Reaccredited 'A+' Grade by NAAC | Affiliated to Bengaluru University

7.1a

Facility of Energy Resources and Consumption of Energy

Preamble

Surana college campus receives power supply from the state electricity board (BESCOM – Bangalore Electricity Supply Company Limited) as HT 11 kV.

The incoming power supply from BESCOM is received at the transformer yard inside the college premises. The 11kV rated HT power supply is stepped down to LT 415 V, by using the transformer units installed inside college premises

Percentage of power requirement of the college met by the renewable energy sources

The institution has replaced the traditional tube lights with LED lights for academic year

2020-2021. Solar panels are installed in the surrounding premises of the institution. During

2020-2021 a total of 50 No of CFL lights with rating of 40W each were replaced with 20W

LED lights, thus reflecting a total saving of 19.2 units/annum per connection.

Thus, total annual power saving = 19.2 units/year per connection.

- Total power requirement of the institution is **80.5KVA/ month per connection.**
- Power requirement met by renewable energy sources- **3.5KVA/ month.**
- Renewable energy source **solar plant.**
- Renewable energy generated and used – **3.5KVA Grant/ used 2KVA.**
- Energy supplied to the grid – **100KVA.**

Surana College

AUTONOMOUS

16, South End Road | Bengaluru-04
Reaccredited 'A+' Grade by NAAC | Affiliated to Bengaluru University

Facility of Energy Resources and Consumption of Energy

The organization has taken care by incorporating new methodologies by replacing normal incandescent bulbs by light emitting diodes (LED) bulbs in order to consume the energy and also in other way of consuming energy by placing solar panels around campus and for the academic year 2020-2021 replaced incandescent bulbs to LED bulbs have been listed out and calculated the less power consumption by LED bulbs than the incandescent bulbs.

Objectives:

- The organization is been implemented by consumption of energy by placing Diesel generator set (**DG SET**). DG set (125kVA & 100 kVA) is used as standby source of power supply, during power failure from BESCO. DG set installed at the college premises.
- In order to consume energy switch on and switch off modes have been practiced in the campus whenever it is necessary.
- There are several numbers of solar panels have been installed around the college to save energy.
- The institution has built with Electrical panel room, the main distribution of power supply will be in the electrical panel room from LT supply from the transformer.
- The college has recruited one person or electrician to handle issues of power supply and also will be taken care of electrical issues in the campus.
- It is instructed the instructors and also students to switch off fans, lights, computers and AC units after class hours so that energy will be consumed.
