Instructor's Course File

Name of the Faculty	N Venkatesh Kumar				
Designation & Email	Associate Dean / director@surnacollege.edu.in				
Subject Code	2.6				
Subject Description	Quantitative Techniques and Operations Research				
Type the course	Core Course				
AY / Semester	2017-18 / II				
No. of Hours	Lecture	Case Discussion	Role Play	Simulation	Live Project
		39	--	05	

1. INTRODUCTION OF THE COURSE

Resources are always critical in any organization. They are unavailable in unlimited manner. There are always constraints. Operation research is helpful in the situation of such constraint of resources. Managers have to manage limited available resources in such a way that neither production nor other activities get disturbed in the business. Facility design is a fascinating area for OR. The excitement of operation research lies in the application of Quantitative techniques to real world problems.

2. COURSE OBJECTIVES

1. To impart knowledge in concepts and tools of OR and QT
2. To help students apply these tools in managerial decision making

3. COURSE OUTCOMES (COs)

1. Students will be able to *recognise and list* the fundamentals of Operations research applications and its prominent uses in modern day business functions

2. Students will be able to *classify* various Operations research models and *distinguish* the models based on changing business scenario
3. Students will be able to *apply* the various Operations research models in complex business situations
4. Students will be able to critically *compare* the statistical tools by relating the assumptions and *employ* the appropriate tool
5. Students will be able to *hypothesis* and *collate* the business facts for making rational decisions
6. Students will be able to *construct* appropriate models, which would help the organisations to *predict* and *assess* the outcomes

4. GENERIC CURRICULUM

Module No.	Framework	No. of Hours
1	Origin and development: Importance, scope, techniques and characteristics, Optimization concept, Different types of models, Linear programming problem, Formulation, Product allocation, Blending and diet problems, Graphical solution Simplex method (standard maximization) problems, Formulation of duality.	10
2	Transportation: Importance, terminologies used, different methods for finding Initial basic feasible solution; NWCM, LCM and VAM, unbalanced, degeneracy in transportation, test for optimality (MODI method only), maximization problems.	10
3	Assignment: Importance and characteristics of assignment problem, methods minimization, maximization, balanced, unbalanced, prohibited and travelling salesman and crew assignment problems. Sequencing: terminologies and notations, types of sequencing problems; processing 'n' jobs through 2 machines, processing 'n' jobs through 'm' machines.	10
4	Network analysis: Phases, objectives, basic rules, PERT and CPM techniques, critical path and float analysis, probabilities in PERT analysis, project crashing problems.	10
5	Theory of games: Types, pure and mixed strategies with two people zero sum game, principle of dominance. Queuing Theory(waiting line): Single server/single queue, essential features of queuing system, single queue, operating characteristics of queuing system, probability distribution in queuing system, multi-server, description of other queuing models (only description).	6
6	Simulation: Basic concepts, procedures and application, Monte Carlo simulation using Random numbers.	10

	Replacement Models: Failure mechanism of items, assumptions of replacement theory, types of replacement problems, replacement of items which deteriorates with time, replacement of items that fail completely including group replacement.	
--	---	--

5. AUGMENTED CURRICULUM

1. Assigning dummy organisations and dummy markets considering a real business opportunity and ascertaining the optimum transportation cost associated with the logistics of materials.
2. Stock Prices simulation exercise: Each student shall be assigned to collect stock price data pertaining to past 5 years and attempting to ascertain probable stock prices.
3. Project activity exercise: Each student shall be assigned an organisation and considering the business model of the organisation, they will be asked to conceive an idea to develop a new product and depicting the same in the form of network and draw inferences about project completion time and resources requirement and so on.

13. PROGRAMME EDUCATIONAL OBJECTIVES

PEO 1: To imbibe inquisitiveness towards critical thinking, innovation and envisioning new business paradigms amongst future leaders of business enterprises through synthesising cognitive management knowledge and thriving wealth creation to stakeholders of the organisation

PEO 2: To instil the spirit of entrepreneurship by demystifying plethora of small business opportunities and facilitate to become progressive serial entrepreneurs, which enable them to significantly contribute to the trajectory of national mission

PEO 3: To intensely develop values-based leadership traits among management graduates to effectively manage cross-cultural work force in a globally competitive work environment

PEO 4: To cultivate the spirit of inquiry, honesty, ethical comportment in work culture, value creation to society and sensitise towards sustainable use of natural resources

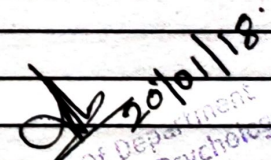

14. PROGRAMME OUTCOMES

By the end of completing 2 years full time Masters Programme in Management Science, Graduates of MBA will be able to:

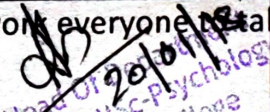

1. Introspect and manage themselves through better understanding of self-personality traits and lead others to achieve organisational goals
2. Nurture and contribute effectively in a cohesive team environment
3. Foresee, contemplate and examine complex business data for effective managerial decisions and its impact on strategic direction of the organisation
4. Envisage organisation's expectations and communicate effectively to stakeholders
5. Unleash innovative ideas and strategic skills to devise strategic and tactical business plans in dynamic business environment
6. Optimal utilization of resources for the betterment of organisation and society
7. Understand the global management perspectives and function effectively in culturally diverse settings
8. Commit themselves for sustainable career growth and learn robust management principles through life-long learning
9. Act with highest business ethics and integrity by perceiving deeper insights about complex global business environment

1. INTRODUCTION OF THE COURSE

Statistics education research over the last decade has pointed out the development of statistical literacy and interpretive skills as a universally recognized goal of instruction (Rumsey, 2002; Delmas, 2002). Chance (1997) argued that as instructional goals in statistics courses change emphasizing statistical literacy skills over procedural calculations, there is need for instructors to accompany these new goals with more authentic assessment techniques to evaluate progress towards these goals. This course is designed to adopt Gal's conception of adult statistical literacy as "the ability to interpret, critically evaluate, and communicate about statistical information and messages" (Gal, 2002). Gal's statistical literacy model comprises two broad interrelated components; namely: (1) knowledge component which consists of five cognitive elements: literacy skills, statistical knowledge, mathematical knowledge, context knowledge, and critical questions; and (2) dispositional component which consists of three related but distinct concepts; namely: critical stance, beliefs and attitudes.

2. COURSE OBJECTIVES

1. To elevate students' awareness of data in everyday life and prepare them for a career in today's age of information.

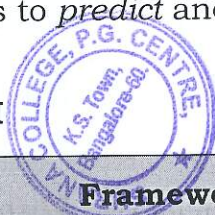

2. To impart to students, an assured level of competence, or understanding, of the basic ideas, terms, and language of statistics.
3. To develop statistical literacy skills in students in order to comprehend and practice statistical ideas at many different levels.
4. To promote the practice of the scientific method in our students: the ability to identify questions, collect evidence (data), discover and apply tools to interpret the data, and communicate and exchange results.

3. COURSE OUTCOMES (COs)

1. Students will be able to *recognise and list* the fundamentals of statistical applications and its prominent uses in modern day business functions
2. Students will be able to *classify* various statistical models and *distinguish* the models based on changing business scenario
3. Students will be able to *apply* the various statistical models in complex business situations
4. Students will be able to critically *compare* the statistical tools by relating the assumptions and *employ* the appropriate tool
5. Students will be able to *hypothesis* and *collate* the business facts for making rational decisions
6. Students will be able to *construct* appropriate models, which would help the organisations to *predict* and *assess* the outcomes

4. GENERIC CURRICULUM

Module No.	Framework	No. of Hours
1	Role of statistics: Applications of statistics in managerial decision-making; Phases of a statistical study, Presentation of data to convey meaning - Tables, Graphs and Frequency Distribution, Measures of central tendency: Mean, Median and Mode and their implications, Measures of Dispersion: Range, Mean deviation, Standard deviation, Coefficient of Variation, Skewness, Kurtosis	8
2	Time series analysis: Concept, Additive and Multiplicative models, Components of time series. Trend analysis: Least Square method, Linear and Non- Linear equations, Exponential smoothing method, Applications in business decision-making. Index Numbers: Meaning, Types of index numbers, Uses of index numbers, Construction of Price, Quantity and Volume indices, Fixed base and Chain base methods Correlation: Meaning and types of correlation, Karl Pearson and Spearman rank correlation.	12

	Regression: Meaning, Regression equations and their application	
3	Probability: Concept of probability and its uses in business decision-making; Addition and multiplication theorems; Bayes' Theorem and its applications. Probability Theoretical Distributions: Concept and application of Binomial; Poisson and Normal distributions	10
4	Introduction to sampling distributions, Sampling distribution of mean and proportion, Sampling techniques Estimation: Point and Interval estimates for population parameters of large sample and small samples, Determining the sample size.	8
5	Estimation Theory and Hypothesis Testing: Sampling theory; Formulation of Hypotheses; Application of Z-test, t-test, F-test and Chi-Square test Techniques of association of Attributes & Testing ANOVA one and two way, Design of experiments	8
6	Chi-square test for single sample standard deviation, Chi-square tests for independence of attributes and goodness of fit, Sign test for paired data, Rank sum test Kolmogorov-Smirnov, Test for goodness of fit, comparing two populations, Mann - Whitney U test and Kruskal Wallis test, One sample run test, rank correlation Decision Theory - Decision under certainty, Decision making under risk (EMV criteria) and Decision making under uncertainty.	10

5. AUGMENTED CURRICULUM

1. Construction of frequency distribution matrix for respective organisation's one year stock price data. Each student has been distinctively given a list organisation either Bombay Stock Exchange or National Stock Exchange.
2. Determination of real time central tendency measures such as Mean, Median and Mode for their respective organisation taking sales, gross profit and net profit etc.
3. Determination of correlation and regression coefficient using selected companies stock price data and index data. And apparently, constructing predictive model to determine the future stock price data.

11. METHODOLOGY FOR CONTINUOUS INTERNAL EVALUATION & EXTERNAL ASSESSMENT

S. No.	Parameters for Evaluation	I
1	Internal Test (10,5)#	10
2	Assignments (5,0)#	5
3	Presentation (5,0)#	5
4	Books/Journal Review (5,0)#	5
5	Attendance (5,5)#	5
6	Case Study Preparation (0,10)#	--
7	Mini Project (0,10)#	--
Total Internal Assessment		30
Total External Assessment (UE)		70
Total		100

depicts the applicability of parameters in respective semesters. The marks distribution in brackets shall be read as (I&II, III&IV) accordingly. For I & II semester, the average internal test score shall be considered for final assessment.

12. COs & POs MAPPING FRAMEWORK

POs →	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9
COs ↓									
CO1		X	X		X		X	X	
CO2			X	X	X		X	X	
CO3	X	X	X	X		X	X	X	X
CO4	X		X	X		X			X
CO5	X	X			X	X	X		X
CO6	X	X	X		X	X	X		X

(Each correlation in the above matrix shall be marked 'X')

13. PROGRAMME EDUCATIONAL OBJECTIVES

PEO 1: To imbibe inquisitiveness towards critical thinking, innovation and envisioning new business paradigms amongst future leaders of business enterprises through synthesising cognitive management knowledge and thriving wealth creation to stakeholders of the organisation

PEO 2: To instil the spirit of entrepreneurship by demystifying plethora of small business opportunities and facilitate to become progressive serial entrepreneurs, which enable them to significantly contribute to the trajectory of national mission

PEO 3: To intensely develop values-based leadership traits among management graduates to effectively manage cross-cultural work force in a globally competitive work environment

PEO 4: To cultivate the spirit of inquiry, honesty, ethical comportment in work culture, value creation to society and sensitise towards sustainable use of natural resources

15. PROGRAMME OUTCOMES

By the end of completing 2 years full time Masters Programme in Management Science, Graduates of MBA will be able to:

1. Introspect and manage themselves through better understanding of self-personality traits and lead others to achieve organisational goals
2. Nurture and contribute effectively in a cohesive team environment
3. Foresee, contemplate and examine complex business data for effective managerial decisions and its impact on strategic direction of the organisation
4. Envisage organisation's expectations and communicate effectively to stakeholders
5. Unleash innovative ideas and strategic skills to devise strategic and tactical business plans in dynamic business environment
6. Optimal utilization of resources for the betterment of organisation and society
7. Understand the global management perspectives and function effectively in culturally diverse settings
8. Commit themselves for sustainable career growth and learn robust management principles through life-long learning
9. Act with highest business ethics and integrity by perceiving deeper insights about complex global business environment
