Macbeth

Because we first hear of Macbeth in the wounded captain's account of his battlefield valor, our initial impression is of a brave and capable warrior. This perspective is complicated, however, once we see Macbeth interact with the three witches. We realize that his physical courage is self-doubt—struggle for mastery of Macbeth throughout the play. Shakespeare uses Macbeth to show the terrible effects that ambition and guilt can have on a man who lacks strength of character. We may classify Macbeth as irrevocably evil, but his weak character separates him from Shakespeare's great villains—Iago in *Othello*, Richard III in *Richard III*, Edmund in *King Lear*—who are all strong enough to conquer guilt and self-doubt. Macbeth, great warrior though he is, is ill equipped for the psychic consequences of crime.

Before he kills Duncan, Macbeth is plagued by worry and almost aborts the crime. It takes Lady Macbeth's steely sense of purpose to push him into the deed. After the murder, however, her powerful personality begins to disintegrate, leaving Macbeth increasingly alone. He fluctuates between fits of fevered action, in which he plots a series of murders to secure his throne, and moments of terrible guilt (as when Banquo's ghost appears) and absolute pessimism (after his wife's death, when he seems to succumb to despair). These fluctuations reflect the tragic tension within Macbeth: he is at once too ambitious to allow his conscience to stop him from murdering his way to the top and the end of the play, he seems almost relieved—with the English army at his gates, he can finally return to life as a warrior, and he displays a kind of reckless bravado as his enemies surround him and drag him down. In part, this stems from his fatal confidence in the witches' prophecies, but it also seems to derive from the fact that he has returned to the arena of the battlefield. Unlike many of Shakespeare's other tragic heroes, Macbeth never seems to contemplate suicide. "Why should I play the Roman fool," he asks, "and die / On mine own sword?" (5.10.1-2). Instead, he goes down fighting, bringing the play full circle: it begins with Macbeth winning on the battlefield and ends with him dying in combat.

Lady Macbeth

Lady Macbeth is one of Shakespeare's most famous and frightening female characters. When we first see her, she is already plotting Duncan's murder, and she is stronger, more ruthless, and more ambitious than her husband. She seems fully aware of this and knows that she will have to push Macbeth into committing murder. At one point, she wishes that she were not a woman so that she could do it herself. This theme of the relationship between gender and power is key to Lady Macbeth's character: her husband implies that she is a masculine soul inhabiting a female body, which seems to link masculinity to ambition and violence. Shakespeare, however, seems to use her, and the witches, to undercut Macbeth's idea that "undaunted mettle should compose / Nothing but males" (1.7.73-74). These early women use female methods of achieving power—that is, manipulation—to further their supposedly male ambitions. Women, the play implies, can be as ambitious and cruel as men, yet social constraints deny them the means to pursue these ambitions on their own.

Lady Macbeth manipulates her husband with remarkable effectiveness, overriding all his objections; when he hesitates to murder, she repeatedly questions his manhood until he feels that his most venial murder to prove himself. Lady Macbeth's remarkable strength of will persists through the murder of the king—it is she who secures her husband's nerves immediately after the crime has been perpetrated. Afterward, however, she begins a slow slide into madness—just as ambition affects her more strongly than Macbeth before the crime, so does guilt plague her more strongly afterward. By the close of the play, she has been reduced to sleepwalking through the castle, desperately trying to wash away an invisible bloodstain. Once the sense of guilt comes home to roost, Lady Macbeth's sensitivity becomes a weakness, and she is unable to cope. Significantly, she apparently kills herself, signaling her total inability to deal with the legacy of their crimes.

Duncan

The king of Scotland should be a figurehead of order and orderliness, and Duncan is the epitome, or supreme example, of this. His language is formal and his speeches full of grace and graciousness, whether on the battlefield in Act I, Scene 2, where his talk concerns matters of honor, or when greeting his kind hostess Lady Macbeth in Act I, Scene 6. Duncan also expresses humility (a feature that Macbeth lacks) when he admits his failure in spotting the previous Thane of Cawdor's treachery: "There's no art to find the mind's construction in the face" (1.4.11).

Most importantly, Duncan is the representative of God on earth, riding by divine right (ordained by God), a feature of kingship strongly endorsed by King James I, for whom the play was performed in 1606. This "divinity" of the king is made clear on several occasions in the play, most notably when Macbeth talks of the murdered Duncan as having "silver skin lac'd with golden blood" (Act II, Scene 3). The importance of royal blood, that is, the inheritance of the divine right to rule, is emphasized when, in the final scene, Duncan's son Malcolm takes the title

"Fair is Foul, and Foul is Fair"

Influence of Supernatural characters on

MACBETH

The witches gave him a false sense of invincibility, causing him to believe he would not be defeated.

There was also change in his personality

- OLD = "will all great Neptune's ocean wash this blood / from my hand."
- NEW = "The castle of Macduff I will surprise, seize upon life; give to the edge o' th' sword, his wife, his babes, & all complacencies of the sin: I will be true to the souls that trace him in his line."

The witches in Macbeth are symbolic of the guilt within Macbeth's soul.

The supernatural element hastens the downfall of the hero.

"Is this a dagger which I see before me, the handle toward my hand?"

"It will have blood, they say, blood will have blood."

"Double, double toil and trouble; Fire burn and caldron bubble"

"Let not light see my black and deep desires"

"Something wicked this way comes"

"None of women born shall harm Macbeth"

Banquo

Banquo's role in the original source for Macbeth was as Macbeth's co-conspirator. In Shakespeare's play, he is depicted instead as Macbeth's rival: the role of fellow plotters passed to Lady Macbeth. Like Macbeth, Banquo is open to human yearnings and desires. He is, for example, just as keen to hear what the Witches have to say for him in Act I, Scene 3. He is kept from sleep by his dreams of the Witches (Act II, Scene 1). And in his soliloquy at the start of Act III, Scene 1—"O, how hath it now—there is more than a hint of resentment and, possibly, fear for several reasons. First, he is ignorant of what the audience knows concerning the murder of the king and of his own impending doom. Second, he is a father whose relationship with his son is clearly an affectionate one.

BHAKTI MOVEMENT

7th Century

The Bhakti movement

The Bhakti movement refers to the massive devotional trend that emerged in medieval India and later reemerged in Bhaktism. It originated in the seventh century among south Indian devotees of Lord Venkateswara and Rameswara, and spread northwards to Bengal over the next two centuries, reaching its zenith in the 15th century CE. The Bhakti movement inspired devotional service of flowing gods and goddesses, such as Radha-Krishna (Vishnu), Shaktism (Shakti goddess), and the worship of personal forms ranging from Hindu deities of Devas to abstract concepts of Advaita Vedanta. The movement has traditionally been considered as an informal social reformer in traditional sense and advocate of both gender equality. Bhaktism's scholarly approach to religion is that they regard Bhakti movement as a reform or rebellion of reestablishment of ancient Vedic traditions. The Bhakti movement includes the Bhagavad Gita, Bhagavata Purana and Padma Purana.

Terminology

The word "Bhakti" is derived from the root bhū, which means "to give, to participate, to belong to". The word also means "attachment, devotion to, love, worship, piety to something as a spiritual, religious practice or means of salvation".

MIRA BAI

Mira, also known as Mira Bai, was a 16th century Hindu mystic poet and devotee of Krishna. She is celebrated as a poet and has been claimed by the Hindu Hindu tradition of Bhakti.

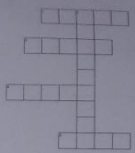

Mira was born into a Rajput royal family of Rathore district of Pali, Rajasthan, India. She is mentioned in Bhakti literature, claiming that she was widely known and a central figure in the devotion. She was born in 1497 CE. Most legends about Mira mention her Krishna as her husband, and she being persecuted by her in-laws for her religious devotion. She has been the subject of numerous folk songs and bhajans in legends, which are recited or sung with different details.

Mira was a Rajput princess born in about 1497 (likely 1495) in Mirra, Rajasthan in northwest India.

Her father, Ratan Singh Rathore, was the ruler of a small Rajput kingdom Kauli, district Pali, Rajasthan. Her mother died when Mira was a baby, and she was the only child of her parents. She was educated in music, religious practices and government. The prince of Mathura, the crown prince of Mewar in 1516. Her husband was considered to be of the royal lineage. Krishna as her husband, and she being persecuted by her in-laws for her religious devotion. She has been the subject of numerous folk songs and bhajans in legends, which are recited or sung with different details.

After the death of her father-in-law, Ratan Singh became the ruler of Mewar. According to a popular legend, he is said to have tried many times to succeed her, such as sending Mira a glass of poison and telling her to drink it, or sending her a basket with a snake instead of flowers. According to the biographical legends, she was not harmed in either case, with the snake miraculously becoming a Krishna idol or a potful of flowers depositing on the various. In another version of these legends, she is said by Ratan Singh to be shown herself, which she did not do but herself drinking in water.

Bhakti Movement had its genesis in the South of India in the early 7th century. It is characterized by the writings of its poet and saints, many of whom were female that exalted passionate devotional love for the divine. The Bhakti Movement gained momentum later in the central western region of India and then moved northward.

Female poet-saints also played a significant role in the Bhakti Movement at large, though many had to struggle for acceptance in the male dominated movement. This poetry is grounded in the everyday, familiar language of ordinary people.

The impact of the movement was similar to that of the Protestant Reformation in Christianity in Europe. It elevated sacred religiosity, shed emotional and intellectual ties to the divine and pursued a spiritual idea.

Alzheimer's progress slower after 80

Researchers believe that Alzheimer's disease progresses more slowly in people aged 80 and older. The study, published in the journal *Alzheimer's & Dementia*, found that the rate of cognitive decline was significantly lower in the oldest participants compared to younger ones. This suggests that the brain's ability to compensate for damage may be more robust in older individuals.

Simple eye test may detect Alzheimer's

A simple eye test could help detect Alzheimer's disease before cognitive symptoms become apparent. Researchers from the University of California, San Diego, used a computerized eye-tracking system to analyze how people with Alzheimer's look at faces. They found that these individuals spent less time looking at the eyes and more time looking at the mouth, a pattern that could serve as an early diagnostic tool.

People with autism can recognize lies, finds study

People with autism spectrum disorder (ASD) can recognize lies, contrary to previous beliefs. A study from the University of Cambridge found that individuals with ASD were just as accurate as neurotypical people in identifying false statements. This challenges the long-standing theory that people with ASD lack the ability to understand social cues and deception.

Surgeons' skills improve with age, study finds

Surgeons' skills improve with age, according to a study published in *PLoS One*. The research, which involved a simulation of a surgical task, showed that older surgeons performed better than younger ones. This improvement is attributed to increased experience, refined motor skills, and better decision-making under pressure.

BPA in plastic disrupts reproductive system

BPA in plastic disrupts the reproductive system, according to a study from the University of California, San Diego. The study found that BPA exposure in mice led to changes in the expression of genes involved in the development of the reproductive system. These findings suggest that BPA, a common chemical found in many plastics, may have adverse effects on human fertility.

Social isolation may lead to fear, stress

Social isolation may lead to fear and stress, according to a study from the University of California, San Diego. The research found that mice that were socially isolated showed increased levels of stress hormones and fear responses. This indicates that social interaction is crucial for maintaining mental and physical health.

STRESS AND MENTAL HEALTH

WHAT IS STRESS?
 This is the body's reaction to any change that requires an adjustment or response. The body reacts to these changes with physical, mental and emotional responses. How do stress affect the body mentally?
 Stress symptoms can affect your body, your thoughts and feelings and your behaviour. Stress that's left unchecked can contribute to many health problems such as high blood pressure, heart disease, obesity, depression or anxiety. But fear not, not all stress is bad. In some ways, everyone feels stressed from time to time. Stress can motivate people to prepare or perform. It's when they react to stress that stress can be life-taking sometimes. But health problems can occur if the stress response you feel for long or becomes chronic. Different people may feel stress in different ways. Some people experience mainly digestive symptoms, while others may have headaches, depression, sadness, agitation, anger or irritability. But there are ways to manage stress. Recognize the signs, identify the causes, control your life. You may need to prioritize things you're trying to achieve and re-evaluate your life. Eat healthy, do good, affect your mind, exercise or just go out for a walk. Don't rush to solve, it's okay to sometimes say no. Take the balance between responsibility to others and to yourself. Be mindful, get some help from your relatives even if some needful things that have to be done on grounds. At the end of the day, it's not the stress that kills us - it's the way we react to it. There's always a better tomorrow!

BCAssist APP

An app developed by BCA students of Surana College is a handheld assistant to every computer science student!!

Learning is a continuous process and the focus has now completely shifted to eLearning. Due to the availability of cost-friendly smart phones and with the various feature-oriented applications, students can learn at their pace and take their time at understanding things, as everything is just a click away.

In these changing times, students are more driven towards using a smart phone for every purpose. The world is at the fingertips and a student can get access to any information from anywhere. This reduces the chance of visiting a library and searching for the data. A mobile phone hence can be used for a number of such purposes. What makes the information easily available is mobile applications? Every mobile app has a unique feature which offers its own set of services.

BCAssist is one such educational app that is a one-stop solution for all Computer Science students. In this era where we are surrounded by technology all around us, it's high time the student life gets a touch of technology. BCAssist app enables a student to catch up with everything happening in the IT world right from study material, interview tips to University Notifications.

BCAssist is developed by BCA students **Mahendra T, Syed Afshaan** and **Anoop Kiran R** under the guidance of **Vidya A, Asst. Professor, Dept. of Comp Sc.**

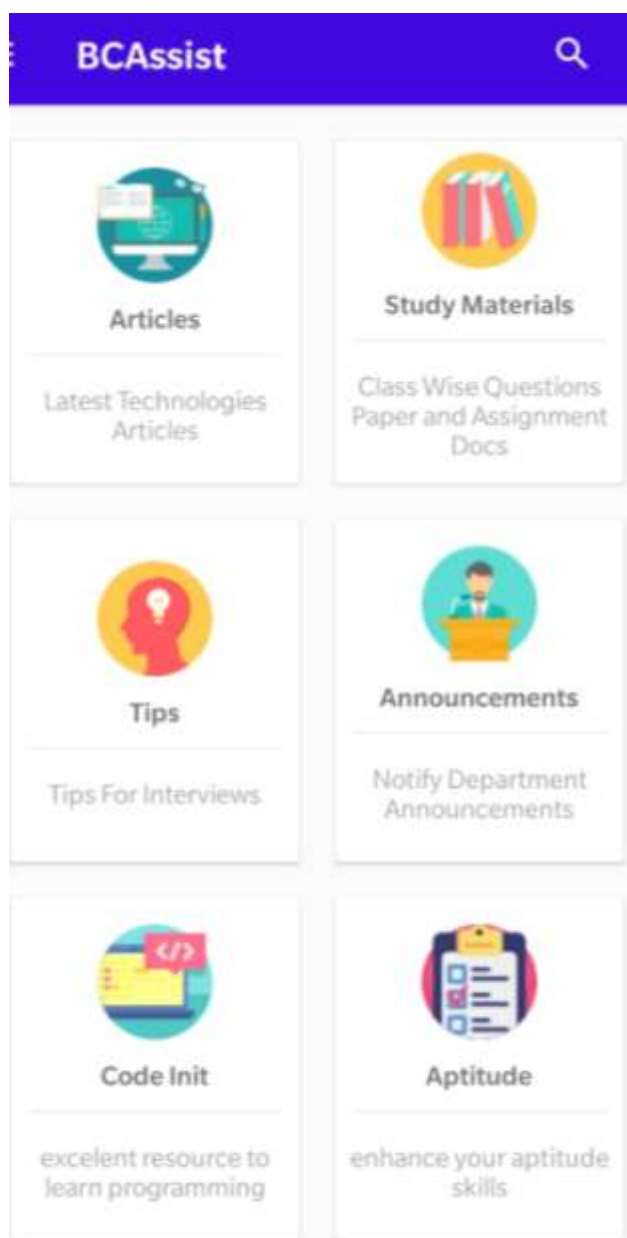

FEATURES OF BCASSIST

- Discover new technical articles
- Easy access to Question Papers, Chapter wise materials and Coding Challenges offline, anywhere anytime

- Free Coding Challenges that let you Improve Coding Skills better
- Insightful tips and strategies to face aptitude, group discussion and technical Interview with more confidence

BCAssist TABS

The app is developed with 6 different tabs for enhancing IT knowledge of every student who wants to hone their technical knowledge!

- **ARTICLES:** This section has articles on latest technologies. Articles are collected from various sources and posted here!
